IMPORTANT DISCLAIMER

The cutting plans and optimizations generated by EdgeCraft are provided for informational and planning purposes only. While our algorithms strive for maximum material efficiency, we cannot guarantee 100% accuracy, nor can we account for physical material defects, blade deflection, manual cutting errors, or machine calibration variances.

It is the sole responsibility of the operator to verify all measurements, material grain directions, and edge banding offsets prior to commencing any physical cuts. EdgeCraft, its developers, and affiliates shall not be held liable for any material waste, financial loss, or damages incurred as a result of using these generated plans. Always measure twice and cut once.
